

# Asphalt Overlay

Crews will be coming to your neighborhood in the near future to perform an asphalt overlay. We will be repaving the road with a 2-inch layer of asphalt. In some areas, we will also mill the edges so that there won't be a large asphalt lip at the edge of the gutter.

There are a few things to keep in mind during the application:

1. **Do not park on the road.** Any parked vehicles must be towed at the owner's expense.
2. **Please trim your trees and adjust mailboxes.** The large equipment can damage low lying limbs or protruding mailboxes. The city is not responsible for any damage within the street right-of-way.
3. Please observe all signs and flagman's directions. You will be unable to park or drive on the road while the "ROAD CLOSED" signs are in place.
4. You will have limited access to your driveway during the overlay process. The crew members are there to assist you.
5. The overlay can leave oil and residue on the surface of the new asphalt. There is also a tack coat that is applied prior to paving operation. Sometimes this tack oil can get on the curb or near your driveway approach. Don't walk or drive on these fresh oils, as they may be tracked onto your driveway and/or into your house.
6. Please contact the city if you would like to repair your curb and gutter. The city has a program to pay up to half of the cost of a curb and gutter repair.
7. The asphalt can be over 300 degrees and can cause severe burns. Do not get near the fresh asphalt.

We look forward to this opportunity to improve your roadway.  
Thank you for your cooperation!
